

Hello,

My name is David Willitzer. I am seeking employment in the architectural field where I can grow with a company for a long time. Attached you will find my resume.

I have more than 3 years experience working for architects. Most of the work I have been involved with is residential and educational. These companies incorporated environmental design and aesthetics into their designs. Much time was spent translating schematics into construction drawings.

I am most familiar with AutoCAD, Photoshop, and Freehand as well as several other layout or 3D rendering softwares.

Currently, I am taking the Architectural Registration Exam. I have completed the Internship Development Program so I look forward to being a registered architect. I can begin work with your group at any time. Please let me know if you would like to interview.

Thank you for your consideration.

Sincerely

David Willitzer
